Proposed Developmental Model

First level: **Service Encounter:** One time experiences which have minimal required hours, emphasis is on the exposure to service. (INT)

Second level: **Service Component:** These service experiences typically are associated with 100 level course work. Typically this would comprise of 3-6 hours of service, structured reflection and integration into the academic curriculum.

Third level: **Service-Learning:** This would be found in upper level courses with expected service hours between 10 -12 hours per semester. There would be intentional and orchestrated reflection which integrates the mission of the university, as well as the learning objectives of the course.

There will be a course proposal and approval process in place for levels two and three. The Service Encounters in level one are independent, but may need monitoring by faculty for the types of service and locations in which students are serving.
